Revised Guidelines for Covid Protocol 19

1. While the rate of Covid spread is still high we will implement a 10-day quarantine policy. If symptoms develop, the quarantine will be for 10 days with day 0 being the day of onset of symptoms. A test for Covid is necessary to determine positive or negative for Covid 19.
2. Students who sit within 3 feet of the positive student will also quarantine if they are not vaccinated. These students may return in 5 days if symptom-free. During days 6-10 these students should be fully masked during all indoor activities. If symptoms develop, they must quarantine for the full 10 days. Again, vaccinated students do not have to quarantine unless they develop symptoms.
3. If a student is exposed to someone (outside of school) with Covid 19 they should quarantine for 5 days and may return to school if they remain symptom free. Any student who is vaccinated does not have to quarantine unless they develop symptoms.
